

Political Leaders and UFOs Global Call for Disclosure!

Unidentified aerial vehicles (UFOs), obviously not from Earth, have been seen in North America since before the United States of America was formed. Even U.S. Presidents and other political leaders have seen them and called for open disclosure of government files on UFOs and extraterrestrial visitors.

Read about U.S. political leaders and UFO disclosure at www.presidentialufo.com and www.paradigmresearchgroup.org.

"Oh, yes. We've discussed this at every conference we've had with the military. There's always things like that going on, flying saucers, this that and the other things you know..." **President Harry Truman**

Eisenhower and ETs

"The document I saw was an official brief to President Eisenhower. To the best of my memory this brief was pervaded with a sense of hope, and it informed President Eisenhower of the continued presence of extraterrestrial beings here in the United States of America.

The brief seemed to indicate that a meeting between the President and some of these visitors could be arranged as appropriate if desired.

The tone of the brief indicated to me that there was no need for concern, since these visitors were in no way, causing any harm, or had any intentions, whatsoever, of causing any disruption then, or in the future". – **Former N.H. State Rep. Henry W. McElroy, Jr on YouTube video**

"The subject is the biggest hot potato of all time."
Henry Kissinger speaking of UFOs

"The American public deserves a better explanation than that thus far given by the U. S. Air Force. I strongly recommend that there be a committee investigation of the UFO phenomena. I think we owe it to

the people to establish credibility regarding UFOs and to produce the greatest possible enlightenment on this subject." - **Gerald Ford**

"It was the darndest thing I've ever seen. It was big, it was very bright, it changed colors and it was about the size of the moon. We watched it for ten minutes, but none of us could figure out what it was.

One thing's for sure, I'll never make fun of people who say they've seen unidentified objects in the sky. If I become President, I'll make every piece of information this country has about UFO sightings available to the public and the scientists." - **Jimmy Carter**

"I was in a plane last week when I looked out the window and saw this white light. It was zigzagging around." I went up to the pilot and said, 'Have you ever seen anything like that?'

He was shocked and he said, 'Nope.' And I said to him: 'Let's follow it!' We followed it for several minutes. It was a bright white light. We followed it to Bakersfield, and all of a sudden to our utter amazement it went straight up into the heavens.

When I got off the plane I told Nancy all about it. But we didn't file a report on the object because for a long time they considered you a nut if you saw a UFO..." - **Ronald Reagan, 1974**

Hillary Clinton, holding the book *"Are We Alone? Philosophical Implications of the Discovery of Extraterrestrial Life"*, with Laurance Rockefeller on his ranch in the late 1990's.

"I think it's time to open the books on questions that have remained in the dark on the question of government investigations of UFOs.

It's time to find out what the truth really is that's out there. We ought to do it really because it's right. We ought to do it because the American people, quite frankly, can handle the truth. And we ought to do it because it's the law."

– **John Podesta**, former Chief of Staff to President Clinton and transition co-manager for President Obama

Tom Tancredo, conservative and former Colorado Congressman, is one of 100's of Congress members briefed on extraterrestrials and UFOs. He is running for Governor of Colorado in 2010

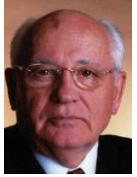

"I suspect that unless the Dept. of Defense proves us otherwise, it probably was some form of alien spacecraft. The lights were really brilliant and it was just fascinating. It was enormous. It just felt other-worldly. In your gut you could just tell it was other-worldly...Behind the scenes I tried to investigate it but got nowhere." – **Former Arizona Governor Fyfe Symington (Rep.)**

SPECIAL INSIDE INFORMATION

According to an inside source, the President of France has informed President Obama on two occasions that if the U.S. did not publicly disclose information about UFOs and extraterrestrial visitors then France would. One of these occasions included twenty pounds of briefing material being presented to President Obama.

Political Leaders Non-U.S. Countries

UFO files have already been made public by Australia, Brazil, Britain, Canada, Denmark, France, Italy, New Zealand, Norway, Russia, Sweden, and Uruguay.

"The Phenomenon [UFO] is real and we should approach it seriously and study it"
- **Mikhail Gorbachev, 1990**

"I think we should be as open as possible, so I would be quite happy to give you a guarantee that if I became prime minister I would always be entirely open and frank

about these things" - **UK Prime Minister David Cameron** in response to a question about UFOs and extraterrestrial visitors during his campaign for Prime Minister.

Former Canadian Minister of Defense, Paul Hellyer on MSNBC, 12/9/05

"I finally concluded, especially after reading a book called 'The Day After Roswell,' written by Colonel Philip Corso, that unidentified flying objects are, in fact real – as real as the airplanes flying over your head, and that there has been a monumental cover-up for more than half a century.

This is after, you know, looking at a lot of evidence and trying to discern who was telling the truth and who wasn't. And I have concluded unequivocally that the people who claim that they have either seen UFOs or have seen classified documents about UFOs, or have seen wreckage from the crash at Roswell, on or about July 4, 1947, are the ones telling the truth. And consequently, I am basing my policy considerations on that. I am hoping that we can persuade the Canadian Senate to hold hearings and listen to some of the 400 witnesses that...Dr. Steven Greer has compiled."

EU Declaration on the Declassification of Documentation on UFOs

At least thirty members of the European Union Parliament, led by Italian EU MP Mario Borghezzi, have reportedly signed the following EU Written Declaration (0057/2010), dated June 14, 2010

The European Parliament, – having regard to Articles 4, 179, 180 and 189 of the Treaty on the Functioning of the European Union, having regard to Rule 123 of its Rules of Procedure,

A. whereas in 1978 the 33rd General Assembly of the United Nations formally recognized UFOs as a valid issue,

B. whereas in 1993 a resolution drafted by the Italian physicist Tullio Regge and seeking to extend to European level the investigative remit of what was then the only government body looking into UFOs (the SEPRA, which has now become the GEIPAN) was tabled in Parliament,

C. whereas many members of the scientific community have been looking into the issue of UFOs and have denounced the systematic covering-up of information on the subject,

D. whereas a study of the material collected by the governments of all the Member States would have major scientific and technological spinoffs,

1. Considers it essential to set up a scientific centre for the analysis and dissemination of the scientific data gathered to date by various European bodies and governments;

2. Calls for public archives on UFOs to be opened up and for records to be declassified by the Member States, thus providing the public and the mass media with access to the full range of documentation on the subject

3. Instructs its President to forward this declaration, together with the names of the signatories, to the Council, the Commission and the governments of the Member States.

Religious Views On UFOs and Extraterrestrials

There is a wide range of views on UFOs and ETs from religious leaders. Following are excerpts from an article by Paola Leopizzi Harris about two Catholic priests who have made public statements about these phenomena:

"We can't anymore deny that something is happening here in this field of ufology. Not just flying saucers, but there might be actual people, beings, extraterrestrial beings."

- **Monsignor Corrado Balducci**, Vatican Theologian, Former Insider Close to the Pope

Monsignor Balducci has been studying UFOs for years. At the X-Conference in Washington DC, Balducci gave permission to the Spanish world to embrace the extraterrestrial reality because it does not conflict with the Catholic religion.

The above, and following, are excerpts from an article by Paola Leopizzi Harris about two Catholic priests who have made public statements about UFOs and ET phenomena:

"The search for extraterrestrial life does not contradict belief in God. How can we rule out that life may have developed elsewhere?"... Just as we consider earthly creatures

as a 'brother' and a 'sister,' why should we not talk about an 'extraterrestrial brother?' It would still be part of creation. ...Ruling out the existence of aliens would be like 'putting limits' on God's creative freedom." - **Father Gabriel Funes** - Jesuit priest and Vatican Observatory Director [These statements were made May 13, 2008, the anniversary of the Madonna of Fatima in the newspaper *Il Osservatore Romano* which is the official mouthpiece of the Vatican]
